Only bebétel's unique and innovative technology makes so much possible!

The reliability of this Swiss quality product is proven by the thousands who use bebétel® all over the world. Free from any radiation and interference, with unlimited range and so simple to use – to name some of its many features. Simply connect bebétel® to a telephone network using the supplied telephone cord or mobile connection cord (bébételMOBILE®) and enter your telephone alarm number. As soon as your child starts to cry, bebétel® will call the programmed telephone landline, mobile or pager number. You can listen to your child and thanks to the integrated loud-speaker you can even choose to talk to them. If you want to make sure that your child is still asleep – just make a check-call into their room. Your child will not notice, but you are able to listen-in and control everything.

"Find freedom with peace of mind."

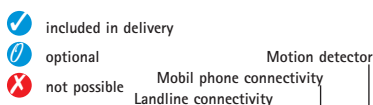

The Most Reliable Way to Monitor Your Sleeping Child

At last! Now you can truly relax in the bar or restaurant on holiday whilst your child is sleeping in the room, safe in the knowledge that they are being reliably monitored.

bébétel® really is the product which mobile-phone users with young families have been waiting for. Freedom and independence is now just a keypad away!

- **bébétel® connects:** Older children can start a call just by pressing any key on the bebétel® without having to lift a handset.
- **bébétel® puts you in contact.** You can offer reassurance through the integrated loudspeaker (hands-free mode).

- **bébétel® is easy to use.** Just enter the telephone number where you can be reached (e.g. your mobile phone).
- **bébétel® monitors your sleeping child.** Unlike other monitors, bebétel® works over the telephone line so there is unlimited range and zero interference.
- **bébétel® calls you.** Any ongoing noise in the monitored room, activates bebétel®. If the motion detector is plugged in (part of bebételCOMBI®), an alarm is also triggered if the child tries to leave the room without making any noise.
- **bébétel® provides security.** For extra peace of mind you can call into your child's room and listen-in 'live' for confirmation that all is well. (PIN-Code protected).

bébételEXTRA®	✓	✗	○
bébételEXTRA/COMBI®	✓	✗	✓

bébételEXTRA®

Baby audio monitor including AC-adaptor (cord 3 m) and telephone cord (8 m).

bébételEXTRA/COMBI®

Baby audio monitor bebételEXTRA® plus additional wired motion detector (cord 8m). You will also receive an alarm call if your child leaves the room without making any noise.

Foreign telephone adapter set so you can plug in the landline telephone cord abroad.

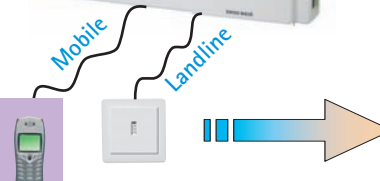

Motion detector (cord 8 m) to add COMBI functionality to bebételEXTRA® or bebételMOBILE®. Also perfectly suited for monitoring your house (burglar alarm).

Battery driven smoke detector In case of smoke the internal siren goes off and if the bebétel® is activated an alarm call will be triggered.

"With the child"

"You"
